STATEMENT FROM THE PRESIDENT OF THE BOARD OF DIRECTORS

Dear friends,

It is with pride and honor that I write to you today as the new President of the Board of Directors of Mason Shalom. My name is Claude Niyonsius, son of Maggy, who brought hope to thousands of people through her humanitarian vision. I myself am a Rwandan living in the United States, working as an aerospace engineer, am married and a father to one child. It is with great pleasure that I take up Maggy's vision to create a new generation that will break the cycle of violence in our Great Lakes region and my satisfaction will be to see these young refugees and Rwandans become actors of peace.

Mason Shalom is much more than just a building; it is a message of love and peace built on a hill that cannot be ignored. Over the past year, we have brought hope to many refugee families and to those in the host community by educating our children and youth, supporting 1,882 people economically and providing psychological support to 193 people. We have also begun construction of the «*École Sainte-Anne de Nyagali*», a project that will meet the needs of the Great Lakes region. This school will promote academic and human excellence, encourage children and youth to live together in dignity and solidarity, welcome children from all backgrounds and be a nursery of excellence & hope. It is a dream we would like to share with the whole world.

Today, Mason Shalom has become much more than a house of peace; it has become a house filled with touching testimonies. Through your unswerving support, young people between the ages of 18 and 28 who have received vocational training have found employment. Adolescent girls who had dropped out of school for various reasons, including early pregnancy, have returned to school. People who have received economic support have been able to make profits and now support their families, and much more.

None of this would have been possible without you, dear friends, partners, and collaborators, who have accompanied us since the beginning of this beautiful humanitarian adventure. We are infinitely grateful for your love, support, and unswerving friendship.

Finally, I invite you to join us on October 26th and 28th, 2023, to celebrate the 30th Anniversary of Mason Shalom. It will be an occasion to celebrate the victory of love.

Thank you from the bottom of our hearts for your commitment and support.

1.2022 IN BRIEF

PRE-SCHOOL EDUCATION

225 Children aged 3-5 are supported to attend preschool education. These are children from the most needy Rwandan and refugee families living in urban areas in Rwanda.

VOCATIONAL TRAINING

544 The most needy young refugees aged 18-30 who are unable to pursue formal education are supported to learn vocational skills. Those who are not employed after the training receive startup kits to start small businesses.

ECONOMIC SUPPORT

709 The neediest refugee and Rwandan households are trained in income-generating activity management in solidarity groups. They are then supported with equipment grants to earn a decent living. Women and youth are given priority.

INTRODUCTION TO COMPUTERS

1684 Refugees are trained in basic computer skills. The knowledge acquired enables them to improve their performance and be competitive in the job market.

SECONDARY EDUCATION

258 The brightest young refugees aged 14-26 from Mahama Refugee Camp and the host community are supported. They are enrolled in public boarding high schools.

UNIVERSITY EDUCATION

53 Successful secondary school graduates among young refugees who have no opportunities to pursue higher education are reintegrated into universities in Rwanda. The selection is based on the points obtained.

PSYCHOSOCIAL SUPPORT

943 Many refugees have experienced various traumas before going into exile. In addition, most of them have fled leaving everything behind and must start their lives from scratch. Urban refugees receive psychological and social support.

ACADÉMIE UBUNTU

140 Launched in 2019 by members of the Burundian diaspora and friends of Maison Shalom, the Académie Ubuntu was designed to meet the needs of refugees through training, awareness-raising, and exchanges on different topics and values useful to their lives.

E-LEARNING

5324 Computer skills enable students to improve their performance and adults to be competitive in the job market through Kigali and Mahama online training centers.

2. VISION - MISSION - GUIDING PRINCIPLES

2.1 VISION

To see every human being live with dignity and flourish fully in every society.

2.2 MISSION

Promote human development by providing psychosocial, educational and economic support to the most needy to empower them and transform them into agents of positive change in their communities.

We believe that every human being has intrinsic value, regardless of social status, socioeconomic status, and ethnic, political, or religious affiliation.

DIGNITY

We share the suffering of our neighbor without feeling sorry for him and we help him to get back on his feet.

COMPASSION

We welcome our differences as a source of strength and inspiration. We live together as members of the same family, respecting each other's freedoms, convictions, and opinions.

HARMONY

We recognize our limits and are open to any constructive contribution from our partners to improve our services.

HUMILITY

We use the goods received for the common good and in transparency towards all our partners.

INTEGRITY

MAISON SHALOM ORGANIZATIONAL CHART IN RWANDA

3. Background

Since October 1993 in Burundi, Maïson Shalom has contributed to improving the living conditions of vulnerable people in general and protecting and promoting the rights of children in particular. Children have been reintegrated and supported in their communities through community development programs (education, health, agriculture, livestock, economic empowerment, and leisure).

In Rwanda, Maïson Shalom has been registered as an international NGO since 2015 to assist refugees and needy populations in the host community. For several years, many Burundian and Congolese refugees have fled political and security crises in their countries to Rwanda. As of December 31, 2022 (HCR data), there were 126,967 refugees, with a large proportion located in the Mahama refugee camp.

The precariousness of refugees' daily lives requires that the government and its partners including Maïson Shalom work together. Through the implementation of a socio-economic inclusion policy, they carry out various interventions to enable refugees to live well during exile and prepare for a constructive return to their countries.

In its intervention logic, Maison Shalom International accompanies the most needy refugees and members of the host community towards self-sufficiency and dignity. The programs developed by Maison Shalom are: education (preschool, secondary, vocational, university, e-learning), economic support (capacity building and micro-project financing), and psycho-social support.

4. EDUCATION

CONTEXT

More than 90% of refugees reside in the camp and others in urban areas in different districts. The Mahama camp hosts 136,967 refugees according to UNHCR statistics as of 31/12/2022.

Most refugee parents and certain categories of the host community cannot afford to finance the education of their children due to their precarious living conditions. Maison Shalom supports the neediest families of refugees and the host community in the education of their children.

4.1. PRESCHOOL AND PRIMARY EDUCATION

Maison Shalom provides support for the educational supervision of the neediest urban refugee and Rwandan children. The preschool and primary education of children residing in the camp is ensured by the Government and the United Nations High Commissioner for Refugees (UNHCR).

The support provided by Maison Shalom consists of paying for school supplies and fees, meals at school as well as transportation for preschool children who are supervised at Maison Shalom's Davis of Peace community center.

4.1.1. Achievements

During the 2022 academic year, Maison Shalom supported 205 children including 143 children at the preschool level and 62 children at the primary level.

4.1.2 IMPACT

- Children have an opportunity to access quality education despite their parents' limited means.
- Children's physical growth and their moral and intellectual development are improved.

ALLOCATION OF CHILDREN IN KINDERGARTEN AND PRIMARY SCHOOL BY LOCATION, GENDER AND LEVEL

No	Location	Preschool			Primary		
		Boys	Girls	Total	Boys	Girls	Total
1	Rigati City	22	17	39	12	28	40
2	Bushasha District	25	16	41	7	7	14
3	Front District	25	12	37	13	15	28
4	Days of peace community center	17	20	37	0	0	0
	Total	79	64	143	32	50	82

4.2. SECONDARY

The criterion of excellence is given priority in the selection of beneficiaries for the secondary education program. Candidates come from Itahama refugee camp and the host community.

The selected youth are then directed to technical and scientific schools with boarding facilities, enabling them to study in better conditions.

4.2.1 ACHIEVEMENTS

The school year 2021-2022 was smooth; there were no interruptions as was the case the previous year. The identified secondary school students were supported by Mission Shalom (tuition fees, school kit, transportation fees, and healthcare) and were placed in boarding schools identified based on the quality of support, teaching, and options (related to the students' choice).

NUMBER OF SECONDARY SCHOOL YOUTH SUPPORTED BY MAISON SHALOM 2016-2022

ANNUAL REPORT 2022

4.3.2 RESULTS AND IMPACT

All the students in classes subject to end-of-year testing passed the national exams.

4.3. VOCATIONAL TRAINING

As recommended by the Rwandan government, technical and vocational education is the key to empowering young people. Maison Shalom enables young refugees and members of the host community to access training in various trades. Some are admitted to Maison Shalom's training centers while others go to external centers depending on the availability of programs and the choice of learners.

4.3.1. ACHIEVEMENTS

In 2022, 544 learners were enrolled in various training programs. They received training fees and materials. After completing the training, they received capacity building support in entrepreneurship and micro-project management. Those interested also received a start-up kit, enabling them to start their own income-generating activities.

		117	94	211	135	178	313

NUMBER OF YOUTH IN VOCATIONAL TRAINING SUPPORTED BY MAISON SHALOM FROM 2016 TO 2022

4.3.3. IMPACT

"I was fortunate enough to receive culinary arts training at Girisika TVET School for nine months. I learned a lot during this training, including how to prepare delicious and balanced meals, as well as techniques for plating dishes. I had the opportunity to do a two-month internship at a renowned hotel in the city, where I was able to make a significant contribution to the hotel's kitchen team. I am grateful to Girisika TVET School for giving me this opportunity to change my life through high-quality vocational training."

-Pascaline N.

4.4. UNIVERSITY EDUCATION

Access to post-secondary education remains a major challenge for youth in developing countries especially for young refugees. Maison Shalom provides an opportunity for eligible young people to pursue university education.

4.4.1 ACHIEVEMENTS

During the academic year 2021-2022, 53 students, including 15 women and 38 men, were admitted to 26 faculties at 30 universities in Rwanda.

NUMBER OF SUPPORTED STUDENTS PER ACADEMIC YEAR

During that same academic year, 8 students completed their university studies and obtained degrees in Nursing Science, Anesthesia, International Relations, Agri-business, Economic Sciences and Management.

4.4.3. RESULT

"Through the university scholarship that I received from Mision Shalom, I was able to pursue my university studies and obtain my degree in rural development. Today, I am confident that my future is bright."

-SolelM, UNILAR

4.5.1. ONLINE LEARNING CENTERS

The isolation of the Mahama refugee camp prevents residents from accessing certain services such as Internet connection and digital resources. To address this problem, Maison Shalom has established two computer centers to enable refugees to access online learning. Currently, Maison Shalom has two centers; one in Kigali and another in the Mahama refugee camp.

Refugees were trained on basic computer skills.

4.5.2. GIRLS EDUCATION FOR A BETTER FUTURE

The national education policy provides equal access to education for all children. However, statistics show that girls attend school less than boys. This situation is due, among other factors, to a school environment that does not offer favorable conditions for their specific needs.

It is in this context that Maison Shalom has intervened to promote girls' education so that they can stay in school and complete their education. These interventions include the rehabilitation of schools in Pacyannat, the establishment and equipping of safe spaces for girls in schools in Pacyannat, the strengthening of the capacities of technical services, administrative and teaching staff, as well as school management/parent committees for inclusion and gender-sensitive pedagogy.

Through this initiative:

174 girls studied in boarding secondary schools,

253 girls learned a trade,

74 girls were supported through catch-up sessions,

1,004 girls received specific academic support,

5 schools in Pacyannat were rehabilitated, and their safe spaces for girls were established and equipped,

7 employees of the local administration's technical service (2 from the district, 3 from the sector, 1 from the cell, and 1 from the village) were trained,

30 parents (5 schools in 5 schools) were trained in school management

5 school directors and 80 teachers were trained to become trainers themselves on inclusion and gender-sensitive pedagogy, the Tusame approach and the center of excellence model developed for FAWE.

A STORY OF A YOUNG GIRL IN RWANDA

Omella, a 15-year-old girl from Mahama, became pregnant during the pandemic and had to suspend her studies. Through individualized follow-up and community mobilization within the framework of EDUFAM, particularly by community relays, Omella was recently able to reintegrate school and is currently in 2nd grade of secondary education.

A few Burundians from the diaspora and friends of Misson Shalom initiated capacity-building sessions for young refugees aimed at training them on diverse knowledge such as leadership, resilience, environment, economy, public health, analysis of social issues, etc. During the year 2023, 140 young refugees followed the modules proposed by the 'Académie Ubuntu'.

5. SOCIO-ECONOMIC SUPPORT

BACKGROUND

The economic life of refugees living in Rwanda and of vulnerable people in the host community is clouded by a number of problems related to the covid-19 pandemic crisis and the subsequent excessive rise in market prices.

The Economic Support Program supports people in need through entrepreneurship training, capacity building in the management of income-generating activities and the provision of micro-credit and in-kind grants. Target groups include the families of children supported by the Education and Psychosocial Support Programs. All these interventions aim to improve their living conditions to enable them to stand on their own two feet for their dignity.

The activities of this program take place in 4 districts: the District of Kinebe in the Eastern Province of Rwanda where the Mahama camp is located, the city of Kigali, the District of Huye (Southern Rwanda) and the District of Rugwera (South-Eastern Rwanda).

5.1. ACHIEVEMENTS

5.1.1. TRAINING

Trainings on entrepreneurship, business set-up and management were organized for 709 people, 50% of whom were refugees and 41% Rwandans. Girls/women were represented at 71.6% and men at 28.4%.

5.1.2 FINANCING OF INCOME GENERATING ACTIVITIES

The beneficiaries of the IGAs are registered refugees in Rwanda and members of the host community in need and residing in the intervention areas.

Out of a total of 90 proposed micro-projects, of which 50 were in solidarity groups and 40 were individual applicants, 64 micro-projects were eligible and financed, of which 34 were in solidarity groups and 30 were individual applicants. The majority of the micro-projects financed are in the field of agriculture and livestock.

These micro-projects involve 520 households represented by 302 women and 208 men; 266 refugees and 132 Rwandans. Of the 520 household representatives supported, 75.8% of these beneficiaries are located in the district of Kiruhura, home to the Mahama refugee camp.

The amount of this funding is 82,652,842 Rwf

NUMBER OF MICRO-PROJECTS FINANCED AND AMOUNTS GRANTED BY AREA

No	District	Number of micro-projects	Households/beneficiaries	Funds in Rwf
1	Kigali	1	1	1,000,000

Total number of households supported over 7 years: 2,624

Total amount granted over the 7 years: 402,878,642 Rwf

5.3. IMPACT

"My name is CIGETERA Aimable, a refugee, married and a father of 4 children. I am part of a solidarity group called TWITENZANGERE (7 members), which received a grant for a livestock breeding. Through this grant, our income has increased by 50%, as each member is able to earn 30,000 RWF from each sale. Before the grant, our capital was limited to the purchase of 5 goats, but currently, our capital is 20 goats. The living conditions of my family have improved."

- CIGETERA Aimable -

6. PSYCHOSOCIAL SUPPORT

Background

During the year 2022, the Psycho-social Support Program team provided psycho-social assistance and support to 643 people. Most of them are refugees (Burundian and Congolese) and some members of the host community, suffering from various traumas, health problems or problems related to day-to-day life.

The precarious living conditions in which refugees live lead some to be afraid to face the future with serenity. This leads to a very dependent lifestyle, with a strong emphasis on freebies, rather than fighting for their own survival. They despair instead of starting on the road to self-development. Through therapeutic listening, discussion groups and group psychotherapy, the psycho-social support team has contributed to giving them hope for life.

6.1. ACHIEVEMENTS

6.1.1. PSYCHOLOGICAL SUPPORT

Individual psychotherapy sessions were organized for 27 people showing signs of trauma or behavioral and psychological disturbance. These sessions enabled them to stand up and to fight with a clear vision of the future.

- LISTENING AND GUIDANCE

Active listening is a tool for re-establishing trusting communication. It is about creating the conditions that facilitate the person seeking help to find a solution to his or her problem and to reconcile with his or her history.

During our interventions, we used this methodology. Cases that could not be solved within the psychosocial support program were directed or referred to authorized or specialized services (e.g. to a doctor, psychiatrist, neurologist, education program officer, economic support program officer, etc.).

INFORMATION, EDUCATION, COMMUNICATION (IEC)

During the group psychotherapy sessions, the Psycho-social Support team prepared one or two themes related to resilience, personal development, well-being and human rights.

The presentations were then followed by exchanges. The testimonies of the participants in the discussion groups allowed those who still had difficult wounds to deal with to benefit from the help of those who had already reconciled with their history. They were able to express themselves and begin the process of dealing with post-traumatic stress, while at the same time realizing that there are other people who have had similar problems and have managed to overcome them.

6.1.2. SOCIAL ASSISTANCE

- 620 people in need identified as such among the host community, in the 4 intervention districts (Kicukiro, Kibeho, Huye and Bugesera), benefited from health insurance cards (250 per district);
- 12 people were assisted with medical care ;
- 64 urban refugees were assisted with food items;
- 12 people in great need have benefited from non-food items (notebooks, uniforms, clothes, school bags, etc.);
- 21 refugees received transport costs for medical treatment.

The table below shows the activities carried out and the number of beneficiaries involved:

BENEFICIARIES OF THE PSYCHO-SOCIAL SUPPORT PROGRAM IN 2023

BENEFICIARIES OF HEALTH INSURANCE CARDS

No.	Districts	Number of heads of beneficiary households	Number of dependents	Total
1.	Madaya	30	130	160
2.	Hama	28	121	149
3.	Latakia	11	78	89
4.	Baniyas	36	144	180
	Total	105	473	578

BENEFICIARIES OF OTHER TYPES OF PSYCHO-SOCIAL ASSISTANCE

N°	Designation	Gender		
		Men	Women	Total
1	Psychological assistance	44	150	194
2	Medical assistance	1	8	9
3	Assistance with transport expenses	14	17	31
4	Food items support	28	46	74
5	Non-food items support	1	10	11
	Total	108	231	339

5.2. POSITIVE IMPACT

According to the testimonies collected during the individual and group psychotherapy sessions, people assisted in the Psychosocial Support Program were able to regain their socio-emotional balance. These sessions enabled the beneficiaries to regain hope for life. Our observation is that individual and group psychotherapy, complemented by discussion groups, have contributed to the restoration of the psychological balance of the beneficiaries.

3. TESTIMONIAL

I am 42 years old. I am a Burundian refugee. Before going into exile, I received death threats. When I arrived in the host country of Rwanda, it was difficult to meet people, especially my compatriots, the Burundians. I saw them as potential enemies. That is why I hid and lived in solitude.

Through the intervention of the psycho-social team of Maison Shalom, everything changed. I was able to start trading in a small shop, and I am proud of who I am. I laugh, I joke with people and I have found joy in life again. I have regained my self-confidence.

For the moment, the little shop has flourished. I was able to buy the equipment for a bar-restaurant worth 7000000 Rwf. I manage this bar-restaurant. I earn a decent living. I pay the rent without difficulty. I take care of my two children without begging. In short, I have turned the page. I am standing up and fighting to earn my daily bread.

- Maria. H -

6.4. CHALLENGES

The main challenges are:

- **Trauma cases** that take a long time to resolve. These include cases of torture, addiction, rape that cause flashbacks, nightmares, insomnia, acute headaches. Psychotherapy sessions can last more than 6 months; it takes a lot of patience to recover. In order to deal with similar cases, we have sometimes adopted the methodology of creating discussion groups. People who have experienced the same psychological problems have helped each other to overcome them.

- **Cultural barriers.** Psychological counselling is sometimes hindered by cultural barriers. In many African cultures it is very rare for adults to express their emotions and feelings or to talk about their private life, especially men. Many consider it shameful to consult a psychologist. One must be mentally ill or weak-minded.

- **Difficult living conditions.** Most of our beneficiaries suffer from having lost everything (job, business, material goods ...). The financial problems they face lead to anxiety and depression for some. This leads them to relive old traumatic situations, to lose their minds and to not find enough energy to adapt to new situations.

- **Limited means compared to the demand.** It is clear that a very large number of refugees need this psycho-social support. Unfortunately, limited staff and material resources of Maison Shalom do not allow us to meet this important demand. For the future, we hope that the complementarity of our programs will provide a sustainable solution to these challenges.

7. DIFFERENT OFFICES OF MAISON SHALOM

In addition to the head office located in Kicukiro District, Kagame Sector, Masisi Shalom has other offices in some of our other intervention Districts:

7.1. IN THE EASTERN PROVINCE IN KIRIHE (ELITE CENTER)

Located in the Mubama refugee camp, it is an office of the organisation, but it has a vocational training section, particularly in computer science, tailoring, leather work, agri-breeding, as well as socio-cultural support for refugees.

It also has a free internet connection and a library open to all refugees in the camp.

In addition to vocational training (tailoring & leather work), computer training, e-learning and courses, the Elite Centre offers a variety of capacity building and intellectual upgrading courses for refugees to enable them to be more competitive in the labour market.

7.2. IN THE SOUTHERN PROVINCE IN HUYE

In order to provide rapid and appropriate responses to the needs of urban refugees residing in Huye District, Mission Shalom has opened its office there.

Currently, our support focuses on the education of refugee children and youth and those of the host community, as well as the economic support of their families.

8. OTHER MAJOR INITIATIVES OF MAISON SHALOM

8.1. OASIS OF PEACE COMMUNITY CENTER IN KIGALI

The Oasis of Peace Community Center is a place of cultural and social development for urban refugees and the Rwandans who use it. It hosts the head office of Maison Shalom and the trade school in Kigali, as well as an event space open to the public.

8.2. ACCOMODATION AND CATERING CENTER IN MAHAMA

In order to contribute to the opening up of the Mahama camp and the host community in terms of access to quality basic services in the area, Mission Shalom has opened a modern restaurant and accommodation center for visitors.

This Hazagara center is a place to learn and practice certain trades (culinary arts, table services, etc.) and creates jobs for the young people already trained. The center has 7 rooms for visitors, a conference room and a restaurant as well as a sales area for bakery and pastry products made on-site by the trainees.

8.3. ECOLE SAINTE ANNE DE KIGALI

1

2

3

4

5

6

7

For a good learning experience that takes into account the inclusion of refugee children in the host community and prepares their constructive return to their countries of origin, the Ecole Sainte Anne de Kigali (ESAK) is under construction. It will provide an adequate environment for intellectual training, adapted to the needs of the children and their communities, focusing on human values, peace education and conflict prevention.

OBJECTIVES OF ESAK

- Establish a structure of bilingual education, of excellence and accessible to all;
- Promote education for human values, peace and conflict prevention

- Create a suitable and appropriate learning environment for children and young people affected by conflict or the consequences of life in exile;

- To create a nursery of future artisans of sustainable peace and inclusive development in the region of the Great Lakes.

The inauguration of the school is expected in 2023.
